### **Corporate Knights Global 100 Most Sustainable Corporations Announced in Davos**

*List of Global 'Good Guys' beating benchmark by substantial margin*

**DAVOS, SWITZERLAND, (embargoed until 2.01 a.m. EST) January 29, 2011**

—

Corporate Knights, the magazine for clean capitalism, announced its seventh annual Global 100 list of the most sustainable large corporations in the world.

From its inception on February 1 2005, the Global 100 Most Sustainable Corporations has achieved a total return of 54.95%, outperforming its benchmark (the MSCI All Country World Index) by more than 16% to December 31st, 2010.

This edition of the Global 100 comes on the eve the final phase of meta-study of corporate sustainability rankings ([\*Rate the Raters\*](#) by the consultancy SustainAbility), which recognizes the Global 100 for its industry-leading standard of transparency.

The 2011 Global 100 tapped intelligence from the world's largest sustainability research alliance put together by Legg Mason's Global Currents Investment Management and Phoenix Global Advisors LLC to isolate the top ten per cent of companies from a universe of 3000 global stocks, which were then transparently ranked based on 10 indicators, with data collected by Corporate Knights Research Group and verified with The BLOOMBERG PROFESSIONAL® service. Controversy research was provided by Sustainalytics and incorporated by Corporate Knights into its assessment of each company to provide risk mitigation against companies with severe controversies that could be deleterious to share valuation.

The Global 100 includes companies from 22 countries encompassing all sectors of the economy, with collective annual sales in excess of \$3 trillion, and five million employees.

Among the 22 countries, Japan led the way with 19 Global 100 companies (14 more than they had in 2010). The United States followed with 13 (one more than in 2010). The UK (11 companies, down from 21 in 2010 ) and Canada (8 companies, down from 9 in 2010) took third and fourth place respectively. Rounding out the top ten scoring countries with the most constituents were Australia (six), France (five), Switzerland (five), Denmark (four), Finland (four), while Brazil, Germany, India, Norway and Spain each registered three Global 100 constituents. Sixty-six per cent of the 2010 companies remained on the list in 2011.

Toby Heaps, Editor-in-Chief of *Corporate Knights* Magazine, says, "The Global 100 are charting out a new prosperity agenda reconciling the megatrend of sustainability with the mega-institution of the corporation. The

kicker: sustainability can be a market-beating strategy, as the Global 100's substantial outperformance demonstrates."

To determine the Corporate Knights Global 100 for 2011, two improvements were made to build on the previous year's methodology.

1. Corporate Knights reviewed controversy research provided by Sustainalytics and incorporated it into its assessment of each company to provide risk mitigation against companies with severe controversies that could be deleterious to share valuation.
2. The indicator "Safety Productivity" (Sales (US\$) / lost-time incidents\*\$50k and fatalities\*\$1M) was substituted for Sustainability Leadership (presence of a board committee dedicated to sustainability issues).

This year's Global 100 were recognized at the Davos World Economic Forum at a private dinner hosted by Corporate Knights and Inflection Point Capital Management. The dinner discussion which was moderated by Matthew Bishop, of *The Economist* Magazine, explored how to define a 21<sup>st</sup> balance sheet for cleaner capitalism that integrates a core group of sustainability factors onto the bottom lines of both companies and countries.

#### **Global 100 Key Performance Indicators Definitions**

##### **Energy Productivity (US\$)**

Sales (US\$) / Total direct and indirect energy consumption (gigajoules)

##### **Carbon Productivity (US\$)**

Sales (US\$) / Total CO<sub>2</sub> and CO<sub>2</sub> equivalents emissions (tonnes)

**Water Productivity (US\$)** Sales (US\$) / Total water use (cubic meters)

**Waste Productivity (US\$)** Sales (US\$) / Total amount of waste produced (tonnes)

**Leadership Diversity** % women board directors

##### **CEO-to-average worker pay**

Ratio of highest paid officer's compensation to average employee compensation (3-year average)

##### **% Tax Paid**

% reported tax obligation paid in cash (3-year average)

##### **Safety Productivity**

Sales (US\$) / lost-time incidents\*\$50k and fatalities\*\$1M)

##### **Sustainability Remuneration**

Whether or not at least one senior officer has his/her pay linked to sustainability

**Innovation Capacity** R&D/sales (3-year average)

#### **Transparency**

% of data points on which the company provided data and level of GRI disclosure

#### **Contact information**

**About Corporate Knights:** Founded in 2002, Corporate Knights Inc. is an independent Canadian-based media company focused on prompting and reinforcing sustainable development. <http://www.corporateknights.ca/>

**The Global 100 Most Sustainable Corporations in the World** is an annual project initiated by Corporate Knights, the magazine for clean capitalism. In 2010, Corporate Knights collaborated with three strategic partners to identify the Corporate Knights Global 100 Most Sustainable Corporations in the World: Inflection Point Capital Management, a sustainability-focused asset management venture founded by Dr. Matthew Kiernan, Legg Mason's Global Currents Investment Management, and Phoenix Global Advisors LLC (a consulting and technology platform focused on sustainability). Launched in 2005, the Global 100 is announced each year at the World Economic Forum in Davos.
